

Energy Audit

The energy audit will be done in three phases.

Phase One (September 2011 through November 2011): Menno Village nursing center and Village Square.

Phase Two (starting about January 2012): Penn Hall Manor building and Penn Hall nursing center.

Phase Three: Penn Hall Renaissance building, Northgate, and the Corporate Office.

In addition, several cottages and villas will be audited: at least eight in Menno Village, five in Penn Hall, and five in Northfield. The cottage and villas will have a blower test (to check for air infiltration), an infrared analysis (to check for heat leakage), and an energy monitoring devices attached to the home to track energy consumption. These audits are expected to be done over the winter of 2011-2012.
